WELCOME TO KSC

Thank you for your interest in Kennedy Space Center and our contribution to NASA's space program. This handbook will familiarize you with the many services provided by KSC's media services organization. The following instructions are in place so that we may better serve you. Feel free to call the KSC Press Site at (321) 867-2468 for clarification of any details.

MEDIA CREDENTIAL AND BADGING INSTRUCTIONS

Requests for media accreditation must be made by a supervisory official, other than the applicant, on company letterhead, clearly indicating the assignment (reporter, photographer, technician, etc.) and social security number of each individual.

Requests can be faxed to (321) 867-2692 or mailed to:

Accreditation
AB-F1
Kennedy Space Center, FL 32899

Credentials to cover Space Shuttle launches will be issued to accredited media representatives only beginning about three days before launch. Badges will be issued from the Pass and Identification Building at Gate 2 on State Road 3 on Merritt Island. (Please refer to attached maps.) The hours of operation at the badging station will be announced via KSC press release about 7 days before launch. Generally, the badging office is open 8 a.m. - 4:30 p.m. on days L-2 and L-1 before launch. On launch day, the badging station will open no later than four hours before launch and close one hour before launch.

Call Patti Beck at the Accreditation Desk, (321) 867-2468, for badging information. Your badge will be valid from lift-off through landing at KSC, or until the Shuttle arrives back at Kennedy Space Center should landing occur in California.

For more information on accreditation, please refer to page 11 - Guidelines for Accredited Media.

LOCATION AND ACCESS

All Space Shuttle press operations are staged from the Complex 39 Press Site. Your badge permits you to drive directly to the Press Site via Gate 2 (State Road 3), Gate 3 (Intersection of U. S. 1 and NASA Causeway) and Gate 4 (Titusville). **Once you have arrived at the Press Site, all movement to other areas must be arranged with a public affairs escort in advance.** **Travel to the Complex 39 cafeteria does not require an escort. However, interviews in the cafeteria are not permitted. Parking facilities at the Press Site are located directly east of the press buildings.**

Media who violate KSC access restrictions are at risk of losing their credential privileges and are at risk of arrest by KSC Security personnel.

NOTE: The possession or consumption of alcoholic beverages or illegal drugs in any form at KSC is strictly prohibited. Violators of this regulation will have their badges pulled and their credentials to cover future Space Shuttle missions revoked. Smoking is not permitted in any KSC facility or government vehicle. (Please see page 11)

NEWS OPERATIONS

The KSC News Center is located at the Press Site in the Launch Complex 39 area of the Kennedy Space Center. Query Desks are staffed by public affairs personnel from NASA Headquarters and NASA field centers, foreign space agency representatives and other organizations associated with the Space Shuttle program.

Inside the KSC News Center, news media will find working space, printed materials, TV/photo operations and tours information. Tables in the press working area are numbered and are assigned on a first-come, first-served basis. Your contact for working area assignments is Patti Beck. Television programming and distribution, communications operations and an auditorium for news conferences are housed in the prefabricated building directly behind the grandstand.

Additional press working space is available in the grandstand and trailer facility located to the southeast of the news center. (Grandstand and trailer space is limited and available on a first-come, first-served basis.) To make distribution of grandstand and trailer space more equitable, the number of seats available to any single news-gathering agency is limited to one, unless a legitimate need for more can be established (two maximum). Grandstand and trailer seats are pre-assigned.

PUBLIC INFORMATION OFFICERS

Public Information Officers (Bruce Buckingham, George Diller and Joel Wells) are on duty during scheduled office hours. They are available for queries and function as official NASA and KSC spokespersons. Contact Bruce Buckingham, News Chief, if a specific appointment is desired, or request to see a PIO at the News and Information Desk.

HOURS OF NEWS CENTER OPERATION

Media representatives should contact the news center for the precise hours of operation for any given mission. The news center will remain open as long as required on launch and landing days. Normal 8 a.m. - 4:30 p.m. duty hours on week days will resume the day after landing.

Media representatives are not permitted at the Press Site during non-working hours. Media representatives who require access to the Press Site during non-working hours need to contact media services well ahead of planned events.

BRIEFINGS

Various briefings are carried live on NASA TV beginning on the days prior to launch. Notices of these and other media activities are available in the news center. KSC-originated briefings (i.e., Countdown Status Briefings, Pre-launch and Post-launch Briefings) are held in the KSC Television Press Site Auditorium. Media are free to watch these briefings from this location and participate in the question and answer period that follows.

TELEPHONE SERVICE

The Kennedy Space Center is linked with commercial telephone systems and you will be able to make outgoing long distance calls collect or by credit card.

Those who wish to arrange for their own telephone lines to be installed on a temporary basis at the Press Site should make arrangements by calling BellSouth, Orlando, Florida, at (321) 245-2215. They will need the number of your grandstand seat or press table seat to meet your service request. All telephone installations are at the requester's expense. Service problems should be discussed with BellSouth. BellSouth does not provide telephone instruments. You must bring your own telephone.

Public Affairs commentary will be carried on the loudspeakers in the Press Site area and on individual audio lines that can be dropped at specific seats or desks in the grandstand or press trailers. This is done at the requester's expense and may be arranged by calling BellSouth. The so-called "black box" circuit carrying Public Affairs commentary is available off-center. This service is also available only at the requester's expense and may be arranged with BellSouth. You must furnish your own speaker boxes with self-contained amplifiers and connections compatible with the modular jacks used for telephone hookups.

RECORDED DAILY STATUS REPORT

A source of information that is continually updated is the recorded daily status report service, an automatic telephone system which has recorded summaries of Shuttle activities, news conference schedules and other matters of news media interest. To access, call (321) 867-2525.

INFORMATION SERVICES

Information queries and administrative services are located in the news center. Personnel from Kennedy Space Center, NASA Headquarters, Johnson Space Center, other NASA installations, and Cape Canaveral Air Station's weather office are normally available to respond to media inquiries. Query desk accommodations are also provided for NASA scientists, Shuttle payload sponsors and public relations personnel. This is also the distribution point for printed press materials. NASA representatives will arrange interviews with space program officials on request. When demand is heavy for an individual's time, interviews may be arranged on a pool basis.

PUBLICATIONS: Publication racks containing information on Shuttle missions and other NASA programs are located in the press working area in the news center. Other historical documents may be requested through Kay Grinter in the news reference library. She can be reached at (321) 867-2493.

TELEVISION/PHOTO OPERATIONS

News representatives whose prime interest is in television or photo operations should contact William (Bill) Johnson or members of the TV/photo team at (321) 867-7819.

A number of photo activities may be covered on a pool basis. These include the astronaut departure from the Operations and Checkout Building on launch day and the launch photo observations from the roof of the Vehicle Assembly Building. Other activities include crew arrival, a sunset/nighttime Shuttle photo opportunity and opportunities to establish photo sites for remote activated equipment. (This offers closer camera views of the Space Shuttle launch than can be obtained from the Press Site.) Media representatives are required to sign up for these and other photo opportunities in advance. The sign-up sheets will be located at the Tour and Interview Counter beginning two days before the launch.

A listing of photo opportunities and established ground rules follow:

1. A survey tour for remote camera locations will be conducted when necessary, usually on L-2 days before launch. Photographers setting up remote cameras will assemble at the Press Site one hour prior to posted departure time. They will be transported into the field by bus.
2. On L-1 day, photographers setting up remote cameras will meet at the Press Site at about 10:30 a.m. for a security check. They will be transported into the field in buses. Each news organization will be limited to four remote cameras per site and only one representative from each news organization will be allowed to set up remote cameras in the field. Remote camera setup will last from approximately 11 a.m. to 4:30 p.m.
3. On L-1, the Rotating Service Structure at the pad is moved to its launch, or park, position. Photographers who wish to document this move should check with the Tour and Interview Counter, or call 867-7819, to determine when they should assemble at the Press Site.
4. On launch day, a photo opportunity for a press pool of no more than 35 people will be permitted to cover the departure of the astronauts from the Operations and Checkout Building (O&C). The 35-member pool will be transported from the Press Site to the O&C in buses where they will set up their cameras outside the roped-off area surrounding the departure ramp.
5. On launch day, photographers and television crews will be escorted to several photo sites for coverage of the launch if they desire to view the launch from locations other than the Press Site. These locations are at the fire training area on Static Test Road, the east end of Astronaut Road, the Banana Creek viewing area and the VAB roof. These sites are identified on maps provided at the Press Site.

Countdown event times vary from mission to mission and news photographers should verify times for specific missions with the audio-visual staff. Most of the activities listed above have number limits and must be signed up for in advance and in person.

NOTE: Media representatives who are escorted to operational areas such as the Orbiter Processing Facility, Vehicle Assembly Building or launch pads must wear full-length slacks or trousers. Shorts and skirts are not permitted in certain areas of these facilities. High-heeled and open-toed shoes are not permitted in operational areas for safety reasons. KSC's operational areas are adjacent to Mosquito Lagoon, the Banana River and their extensive marshes. Mosquito Lagoon did not receive its name frivolously and a reliable brand of mosquito repellent is useful. Those who sunburn easily should consider bringing suntan lotion or sunscreen and wear a hat.

PHOTO AND VIDEO RELEASES

Margaret Persinger is the Photo and Video Librarian. She will coordinate issuing and mailing of these visual releases. Her office is reached by calling (321) 867-7826.

ORIENTATION TOURS

The Tour and Interview Counter is in operation beginning at L-2 days to handle arrangements for press tours and interview requests. Arrangements to take the following general tours should be made with personnel at the Tour and Interview Counter at (321) 867-2692.

PRESS ORIENTATION TOUR: On L-1 day (or as required), an orientation tour of KSC and its facilities is conducted for news media personnel, usually after the pre-launch press conference. This tour includes Space Shuttle launch and processing facilities, facilities in the industrial area and launch sites on Cape Canaveral Air Station.

GENERAL INFORMATION

PRESS DEPENDENTS: The Press Site is a working area and accommodations are limited. Due to space limitations, access is limited to the working press. There are no provisions for handling press dependents. Like anyone else not on official assignment by their media employers, press dependents will not be permitted on base.

CAR PASSES: A limited number of car passes which enable press dependents to view the Space Shuttle launch from an established KSC viewing site may be available. Media representatives interested in obtaining such passes should inquire at the Pass and Identification Building at Gate 2 when they pick up their mission credentials.

AUDIO FEEDS: There are two NASA audio release circuits. (1) The NASA TV AUDIO circuit provides pre-launch status briefings, news conferences, special briefings, mission status briefings, post-landing briefings, and all audio associated with PAO Video Release System television coverage. (2) The NASA MISSION AUDIO circuit provides pre-launch status reports from the Launch Control Center, launch and mission commentary, and voice communications with the crew.

At KSC, these circuits are available at Press Site locations through BellSouth at (321) 245-2215. Clean feeds of launch sound and voice communication with the crew (Air/Ground) are also available through BellSouth.

NASA/KSC will provide limited access to MISSION AUDIO and NASA TV AUDIO without charge at audio feed boxes located in the press grandstands. Limited access to MISSION AUDIO, NASA TV AUDIO, LIFTOFF SOUND and AIR/GROUND will be unilaterally distributed to Broadcast Interface locations throughout the Press Site. Audio distribution boxes with high and low impedance are located throughout the Press Site.

Information on video/audio feeds (i.e., multi-box specifications and operations) may be obtained by calling (321) 867-7819.

NASA TV: All NASA audio/video feeds can be accessed on GE 2, transponder 9C, located at 85 degrees west longitude, vertical polarization. Video channel is at 3880 MHz. and audio channel is 6.8 MHz. The KSC Press Site is located at latitude 28 degrees, 34 minutes, 54.63 seconds; and longitude 80 degrees, 38 minutes, 47.82 seconds.

V-CIRCUITS: News media unable to attend press briefings in person may monitor them by calling (321) 867-1220/1240/1260.

STATUS REPORTS AND NEWS RELEASE ELECTRONIC SUBSCRIPTION SERVICES For automatic e-mail subscriptions to daily Shuttle status reports or KSC originated press releases, you should send an Internet electronic mail message to: domo@news.ksc.nasa.gov. In the body of the message (not the subject line) type the words "subscribe shuttle-status" or "subscribe ksc-press-release" (do not use quotation marks). The system will reply with a confirmation via e-mail of each subscription.

To remove your name from the list at any time, send an e-mail address to domo@news.ksc.nasa.gov. In the body of the message (not the subject line), type (no quotes) "unsubscribe shuttle-status" or "unsubscribe ksc-press-release."

NASA AND KSC INTERNET SITES: Status reports and other NASA publications are available on the World Wide Web at: <http://www-pao.ksc.nasa.gov/kscpao/kscpao.htm> .

Information about the countdown and mission can be accessed electronically via the Internet at: <http://www.ksc.nasa.gov/shuttle/countdown> and at <http://shuttle.nasa.gov> .

USE OF RADIO FREQUENCY/MICROWAVE TRANSMITTING EQUIPMENT: News media organizations planning to operate radio frequency/microwave transmitting equipment for coverage of activities at KSC and Cape Canaveral Air Station are reminded that such equipment is subject to specific restrictions and controls. To ensure that health and safety requirements are met, any organization requiring RF/MW transmitting equipment for their operations must contact the appropriate KSC offices and obtain approval by NASA and USAF to transmit before operating the equipment at KSC or CCAS. Bill Johnson can assist you in obtaining information and approval.

Hand-held Amateur or Citizen Band radio equipment may not be used within the geographical limits of Kennedy Space Center or Cape Canaveral Air Station. Mobile units (CB or Amateur) installed in private vehicles may be used, but are not authorized for commercial purposes.

PARKING: The press parking site is in the large paved and grass area to the northeast of the news center. Media representatives are required to park in this lot. Parking on the Press Site mound in the direct vicinity of the news center or auditorium is strictly prohibited. This area must be kept open for buses and for handicapped parking. Vehicles illegally parked there are subject to removal.

WORK TRAILERS: Limited space for trailers, vans and other vehicles to be used as work areas is available in the press parking lot. These vehicles are not to be used as living accommodations and access to them is limited to the hours the news center is open.

HELIPORT: A heliport is maintained at the Press Site and can be used by news-gathering organizations for time- driven projects only. Flight clearance is required for use of this facility. Clearances must be arranged with Bill Johnson.

FOOD SERVICES: Hot and cold sandwiches, canned food and snacks are available at a mobile canteen which visits the Press Site from time to time. Cold soft drinks are also available from vending machines located in the lobby of the Press Site TV auditorium.

For those looking for a more varied menu, the Complex 39 cafeteria offers full-service meals, a delicatessen line and a salad bar. The normal hours of operation are from 5:30 a.m. - 8:30 p.m. The full-service-meal line is open from 11 a.m. - 8:30 p.m. Check the Query Desk Counter in the news center for cafeteria hours during launch and landing activities.

Food services at Kennedy Space Center Visitor Complex, located on the NASA Causeway, include a selection of sandwiches and light meals from 9 a.m. - 5 p.m.

VOLUNTEERS: KSC Public Affairs relies heavily on the services of volunteers to assist with the multitude of media who visit the Center for Shuttle launches and landings. They are here to assist us because of their dedication to NASA's mission and their desire to see the NASA story told worldwide. Many of our volunteers have spent their entire careers at KSC in a variety of capacities and remain quite knowledgeable of the space program. We welcome their dedication and thank them for their years of support. Because of them our jobs are made much easier.

KSC Landing Operations

All KSC landing operations are staged from the Complex 39 Press Site beginning at about L-4 hours on landing day. Transportation from the Press Site is provided to the Shuttle Landing Facility (SLF). Media interested in covering a Shuttle landing should plan on being at the Press Site in time to catch one of the buses leaving for the SLF. The first bus will leave approximately four hours prior to landing and the last bus departs about 90 minutes before touchdown.

Television satellite trucks, radio broadcast vans and other production vehicles to be escorted to the SLF will depart at the same times as above. NASA TV audio/video, electrical power, and telephone hookups are available at the SLF.

The badging station located at Gate 2 on Merritt Island will re-open about 4 hours prior to landing to accommodate news media requests for accreditation. Check with the accreditation desk at (321) 867-2468 on specific hours of operation. News media personnel already accredited for the launch and mission do not need to be re-badged.

A limited number of press working spaces are available in the bleachers at the Shuttle Landing Facility. Reservations for seating assignments should be coordinated in advance with Patti Beck. Those who wish to arrange for their own telephone lines at the SLF should call BellSouth, Orlando, FL, at (321) 245-2215. They will need the number of your seat assignment.

Remote camera operations at the SLF will be conducted the day before the landing and should be coordinated in advance with Ken Thornsley, (321) 867-7819.

GUIDELINES FOR ACCREDITED MEDIA

May 1998

PLEASE READ THIS BEFORE PROCEEDING TO THE COMPLEX 39 PRESS SITE

Media representatives are only allowed on the Center when NASA Public Affairs personnel are on duty and the Media Services Branch is open. Hours of operation are based on mission activities. A news release listing the hours of operation will be issued prior to launch and landing. Media requiring access to the Press Site beyond the hours of operation must coordinate with NASA personnel **ahead of time**.

Accredited media are allowed to operate within the Press Site boundaries. Special requests at locations other than the Press Site can be accommodated by making arrangements with appropriate NASA Public Affairs Officers.

Media are allowed to drive to the cafeteria without an escort; however, no interviews are permitted there.

News Media representatives are permitted to drive to and from the Press Site only through Gate 2 (State Road 3), Gate 3 (Intersection of U. S. 1 and NASA Causeway) and Gate 4 (Titusville) on KSC.

Stopping to take photographs when traveling between the outer gates and the Press Site is strictly prohibited. Violators will be picked up by KSC Security.

Car passes are available for press dependents or relatives and friends to view the Shuttle launch on the NASA Causeway. These are on a first-come, first-served basis and depend on availability of space. Transportation will not be provided.

Please follow the access rules laid out in the News Media Handbook. Questions concerning the Press Site boundaries should be addressed to the information officers on the query desk or at the Tours and Interview Counter.

It is standard for K-9 units to inspect news media and equipment.

NO ALCOHOLIC BEVERAGES OR WEAPONS ARE PERMITTED ON THE CENTER.
